The Presidential 15/17 Set-Up Guide

1 Connect the monitor arm to the Presidential pole.

2 Tighten down the clamp that attaches the sled to the Presidential pole.

3 Attach monitor arm to Presidential stand with thumbscrew.

4 Attach clamp to stand and secure with screw.

5 Slide Glass into Clamp.

Note: Make sure the aluminum plate on the mirror faces the thumbscrews.

6 Tighten thumbscrews to secure mirror.

7 Use thumbscrew to tighten angle adjustment. Set to approximately 45 degrees and adjust as necessary to center the image in glass.

Note: Raising the monitor higher on the pole increases the image size and brightness. Use the included skirt to hide wires in the raised position.
